Kensington Onion Tassel Fringe and Cordedge in Meadow

SAMUEL & SONS, the premier Passementerie tradition in the interior design community launches its latest exclusive collection, Kensington. The collection evokes sophistication incorporating a visual vernacular reminiscent of old world luxury. The central pattern of this collection, the plush, hand-tied onion tassel fringe, is composed of triple layer onion tassels fastened to twisted cord hangers. The Kensington collection also includes an intricately woven, graceful jacquard braid, vertical stripe cordedge, and double tassel tieback embellished with velvet ruches.

The colors of the Kensington collection are transformational, coordinating with a wide array of matte sophisticated prints, wovens and plains. Kensington's timeless color palette spans pale silvery grays, delicate petal pinks, tranquil orchid purples, vibrant meadow greens, sun-drenched cornsilk golds as well as richer, earthen shades of walnut and russet.

THE KENSINGTON

double tassel tieback is stately in scale and refined in coloration. There is a beautiful rhythm of color within the tightly twisted bullion branches of the skirt and the lush cascade of onion tassel fringe hangers. The tiebacks velvet ruche accents were inspired by the base of the onion tassels.

Each Kensington onion tassel fringe is comprised of over 15 individual colors that mélange and culminate in the sophistication of each color way.

The Kensington braid's dimensionality is created by the combination of its twill ground, interwoven guipures and weathered borders. The vertical stripe cordedge is transitional in nature and color placement. It incorporates an innovative weaving technique that suggests a subtle pleat. Each Kensington onion tassel fringe is comprised of over 15 individual colors that mélange and culminate in the sophistication of each color way. The layering of onion tassels and twisted cord hangers create a luxurious, plush fringe complimented by its multi-color strie header. It is simply magnificent when draped.
